

PARTE	AN	TITOLO	AUTORE	DOI
001	2466175	Invited Review : Pattern Recognition in Plant Innate Immunity	S. Mazzotta and B. Kemmerling	10.1400/169648
002	2466174	Comparison of the Effects of Fusarium Solani Filtrates in Vitro and in Vivo on the Morphological Characteristics and Peroxidase Activity in Pea Cultivars with Different Susceptibility	L. Svábová, A. Lebeda, M. Kitner, M. Sedlářová, M. Petrivalsky ... [et al.]	10.1400/169647
003	2466173	Temporal Progress and Integrated Management of Frosty Pod Rot (Moniliophthora roreri) of Cocoa in Tabasco, Mexico	M. Torres de la Cruz, C.F. Ortiz García, D. Téliz Ortiz, A. Mora Aguilera and C. Nava Díaz	10.1400/169646
004	2466172	Effect of Some Endemic Plants Essential Oils on Bacterials Spot of Tomato	Altundağ, Şenol ; B. Aslim	10.1400/169645
005	2466171	Differential Effects of Organic Compounds on Cucumber Damping-Off and Biocontrol Activity of Antagonistic Bacteria	B. Li, S. Ravnskov, G. Xie and J. Larsen	10.1400/169644
006	2466170	Detection and Characterization of Phytoplasmas Associated with Diseases of Rebus spp. in Poland	Cieslinska, M.	10.1400/169643
007	2466169	Decomposition of Medicago Sativa Residues Affects Phytotoxicity, Fungal Growth and Soil-Borne Pathogen Diseases	G. Bonanomi, V. Antignani, E. Barile, V. Lanzotti and F. Scala	10.1400/169642
008	2466168	Virulence Diversity in North Indian Isolates of Sclerospora Graminicola, the Pearl Millet Downy Mildew Pathogen	R. Sharma, V.P. Rao, S. Senthilvel, S.C. Rajput and R.P. Thakur	10.1400/169641
009	2466167	Occurrence and Pathogenicity of Pseudomonas Fluorescens and P. Putida on Tomato Plants in Italy	M. Dimartino, S. Panebianco, A. Vitale, I. Castello, C. Leonardi ... [et al.]	10.1400/169640
010	2466166	Artificial Evolution Corrects a Repulsive Amino Acid in Polygalacturonase Inhibiting Proteins (PGIPs)	M. Benedetti, E. Bastianelli, G. Salvi, G. De Lorenzo and C. Caprari	10.1400/169639
011	2466165	Influence of the Quantity and Variability of Citrus Tristeza Virus on Transmissibility by Single Toxoptera Citricida	Y. Zhou, C.Y. Zhou, X.F. Wang, Y.Q. Liu, K.H. Liu ... [et al.]	10.1400/169638
012	2466164	Genetic Characterization of Syrian Erwinia Amylovora Strains by Amplified Fragment Length Polymorphism Technique	H. Ammouneh, M.I.E. Arabi, A. Shoaib, M. Rajeh and A. Al-Daoude	10.1400/169637
013	2466163	Implications of Plant Material Origin, Land Use History and Soil Properties in the Incidence of Verticillium Wilt in Olive Groves	E. Rodríguez, J.M. García-Garrido, P. A. García and M. Campos	10.1400/169636

014	2466162	Multilocus Sequence Analysis of <i>Fusarium Poae</i>	T. Kulik and A. Pszczółkowska	10.1400/169635
015	2466161	Development of PCR-Based Techniques for the Detection of Immobilised Potato Virus Y Virions	S.J. Gawande, A. Shukla, V.P. Chimote, N. Kaushal, P. Kaundal ... [et al.]	10.1400/169634
016	2466160	Effectiveness of Plant Essential Oils Against <i>Erwinia Amylovora</i> , <i>Pseudomonas Syringae</i> pv. <i>Syringae</i> and Associated Saprophytic Bacteria on/in Host Plants	B. Kokoskova, D. Pouvova and R. Pavela	10.1400/169633
017	2466159	Transcript Analysis of the Bean Polygalacturonase Inhibiting Protein Gene Family Reveals that PVPGIP2 is Expressed in the Whole Plant and is Strongly Induced by Pathogen Infection	R.M. Kalunke, M. Janni, L. Sella, P. David, V. Geffroy ... [et al.]	10.1400/169632
018	2466158	Incidence of Potato Viruses and Bacterial Wilt Disease in the West Amhara Sub-Region of Ethiopia	B. Bekele, E. Abate, A. Asefa and M. Dickinson	10.1400/169631
019	2466157	Transgenic Plums Expressing Plum Pox Virus Coat Protein Gene Do not Assist the Development of Virus Recombinants Under Field Conditions	I. Zagrai, M. Ravelonandro, I. Gaboreanu, B. Ferencz, R. Scorza ... [et al.]	10.1400/169630
020	2466156	Identification of <i>Circulifer Haematoceps</i> (Hemiptera:Cicadellidae) as Vector of <i>Spiroplasma Citri</i> in the Kerman Province of Iran	M. Omid, A. Hosseini-Pour, H. Rahimian, H. Massumi and C. Saillard	10.1400/169629
021	2466154	Characterization and Variability of Soft Rot-Causing Bacteria in Chinese Cabbage in North Eastern Brazil	I.C.M. Alvarado, S.J. Michereff, R.L.R. Mariano, E.B. Souza, A.M. Quezado-Duval ... [et al.]	10.1400/169628
022	2466153	Sample Size for Quantification of <i>Cercospora</i> Leaf Spot in Sweet Pepper	S.J. Michereff, R.B. Martins, M.A. Noronha and L.P. Machado	10.1400/169627
023	2466150	Host Range and Phylogenetic Analysis of Iranian Isolates of Zucchini Yellow Mosaic Virus	H. Massumi, M. Shaabani, J. Heydarnejad, A. Hosseini Pour and H. Rahimian	10.1400/169625
024	2466148	Evaluation of Biocontrol Efficiency of <i>Pseudomonas Fluorescens</i> UTPF61 in Different Nitrogen Sources	F. Heidari-Tajabadi, M. Ahmadzadeh and R. Sharifi	10.1400/169622
025	2466145	Characterisation of the Coat Protein Gene of Dasheen Mosaic Virus Infecting Elephant Foot Yam	B. Babu, V. Hegde, T. Makesh Kumar and M.L. Jeeva	10.1400/169620
026	2466143	<i>Phomopsis</i> sp. Associated with Post-Harvest Fruit Rot of Kiwifruit in Italy	L. Luongo, A. Santori, L. Riccioni and A. Belisario	10.1400/169617
027	2466141	Diversity of the OMP Gene in <i>Candidatus Liberibacter Asiaticus</i> in China	W.Z. Hu, X.F. Wang, Y. Zhou, Z.A. Li, K.Z. Tang [et al.]	10.1400/169615

028	2466140	Effect of 1,3;1,6- $\beta$ -D-Glucan on the Formation of Abnormal Tobacco Mosaic Virus Particles in The Leaves of <i>Nicotiana Tabacum</i> cv. Samsun	A.V. Reunov, L.A. Lapshina, V.P. Nagorskaya and L.A. Elyakova	10.1400/169614
029	2466139	Development and Validation of a Diagrammatic Scale for Estimation of Anthracnose on Sweet Pepper Fruits for Epidemiological Studies	Pedroso, C. ; Lage, D.A.C. ; Henz, G.P. ; Café-Filho, A.C.	10.1400/169613
030	2466138	Characterization of Latent Viral Infection of Olive Trees in the National Clonal Germplasm Repository in California	Al Rwahnih, M. ; Guo, Y. ; Daubert, S. ; Golino, D. ; Rowhani, A.	10.1400/169612
031	2466137	Coelus, a New Host for <i>Ralstonia Solanacearum</i> Race 1 Biovar 3 in India	Chandrashekara, K.N. ; Prasannakumar, M.K. ; Deepa, M. ; Vani, A.	10.1400/169611
032	2466135	The Arbuscular Mycorrhizal Symbiosis Reduces Disease Severity in Tomato Plants Infected by <i>Botrytis Cinerea</i>	Fiorilli, V. ; Catoni, M. ; Francia, D. ; Cardinale, F. ; Lanfranco, L.	10.1400/169610
033	2466134	Disease Note		10.1400/169609
034	2466133	Instructions to Authors		10.1400/169608
